

CLAX[®] Deosoft Easy2Iron conc 57B1

Fabric softener - easy ironing, long lasting and odor-counter acting

Description

Clax Deosoft Easy2Iron conc is a fabric softening liquid with excellent easy iron properties, malodor neutralising technology and long lasting perfume. The product is specially formulated for use in commercial and on premise laundries, and is suitable for application on most types of fabric and can be manually or auto-dosed.

Key properties

Clax Deosoft Easy2Iron conc is a concentrated fabric conditioner based on biodegradable cationics, quaternary ammonium salts. In the wash solution, these positively charged cationics, adsorb to the negatively charged surface of fabrics. Once adsorbed onto fabric the cationic has a lubricating effect. During the drying process, this prevents interlocking of individual fibres and build-up of static electricity (especially on synthetic fibres). Clax Deosoft Easy2Iron conc contains special raw materials to reduce wrinkling and to make ironing and calendaring easier. The product has been formulated with a longer lasting modern perfume, which leaves a pleasant smell on fabric, and it contains Odor Neutralising Technology (ONT), which reacts with malodor molecules to inactivate them. This is more effective than only masking malodors with a perfume. The product also offers protection against fading of dark linen colors, resulting in fabric looking newer and radiant for longer. Clax Deosoft Easy2Iron conc can be used for most types of fabrics, but is particularly effective on bulked fabrics such as bed sheets and table linen. It also imparts a smooth, silky feel on woven or flat knitted fabric.

Benefits

- Good softening of many types of fabric (towels, sheets, wool, delicate articles etc)
- Prevents build-up of static electricity on synthetic fabrics
- Reduces wrinkles and makes ironing and calendaring easier
- Improves ergonomics for manual ironing due to reduction in required muscular power
- Delivers a pleasant residual smell
- With patented ONT technology for highly effective elimination of malodors
- Preserves colors, especially of dark-colored textiles
- Is based on biodegradable raw materials

Use instructions

The softener should be applied in the last rinse of a washer extractor or in the last section of a continuous batch washer.

Please note that this product should **NOT** be used on: articles made of micro polyester fibres such as cleanroom garments and water repellent theatre linen and cleaning microfibre cloths/wipes or laminated textiles like Gore-Tex.

Dosage*

Dosing level is dependent on wash classification.

Dosage recommendation: 2 - 6 ml/ kg dry goods.

**This dosage is according to optimal conditions, recommendations may vary, please consult with your Diversey representative for directions.*

CLAX® Deosoft Easy2Iron conc 57B1

Technical data

Appearance:	Milky green liquid
Odour:	Floral
pH value (neat):	≈ 3.3
pH value (in use):	≈ 6
Relative density (g/cm ³ ; 20°C):	≈ 1.00
Viscosity (mPa.s; 25°C):	≈ 11

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; sds.diversey.com. Store in original closed containers away from extremes of temperature.
