

Liquid presoaker and silver detarnisher

Description

Suma Gloss K8 is a liquid presoaker specially formulated to provide excellent removal of stubborn stains from cutlery, crockery and silverware.

Key properties

Suma Gloss K8 is an alkaline liquid, which is suitable for presoaking cutlery and items made of silver. It contains a blend of scale inhibitors and alkali, for removal of dried on food from cutlery, crockery and silver ware items. Suma Gloss K8 can also be used to detarnish silverware. The combination of aluminum foil or block, solution and silver items starts an electrochemical process, which removes the tarnish from the silver.

Benefits

- Effectively removes burnt-on food residues and starch
- Safe for use on silverware
- Effectively removes tarnish from silverware in combination with aluminium
- Easy to use, free-flowing powder

Use instructions

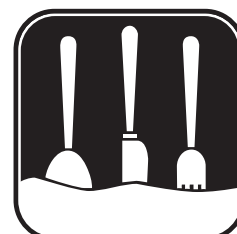

Soaking:

1. Fill a soak reservoir with warm water (40-50°C).
2. Add a minimum recommended dosing of 5g/l*.
3. Immerse the items in the solution for 5-30 minutes, depending on the degree of soiling.
4. Pass items through dishwasher as usual, but do not use a detergent with bleach for silverware.

Silver detarnishing:

1. Place aluminium foil in the base of a non-metallic container. Fill with warm water (40-50°C).
2. Add a minimum recommended dosing of 5g/l*.
3. Immerse silverware for 15-30 minutes. Make sure that the items are in contact with the aluminium but not with each other.
4. Rinse off with water or pass items through dishwasher using a detergent without bleach.

Actual dosage will depend on site conditions (water hardness, degree of soiling, procedures).

K8

Technical data

Appearance: clear liquid

pH value (1% solution): 12,3

Relative density (20°C): 1,22

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; sds.diversey.com. Store in original closed containers away from extremes of temperature.

Only for professional users / specialists.

Product compatibility

Under recommended conditions of use, Suma Gloss K8 is suitable for use on most materials commonly encountered in the kitchen.

However, do not use for alkali sensitive items such as copper and brass.
