

CLAX[®] 100

22A1

Booster - food soils

Description

Clax 100 is a liquid surfactant booster based on a blend of effective surfactants.

Key properties

Clax 100 is an effective booster based on a blend of nonionic surfactants and an optical brightener. This product shows excellent performance on fatty/oily soil. Once removed from fabric, fat and oil are effectively dispersed by Clax 100, thus preventing redeposition. Clax 100 is mainly used in conjunction with alkalinity boosters and/or mainwash detergents. In combination with the latter its main function is to improve dispersion of fatty and oily soil, thus enhancing wash performance on heavily soiled goods such as cotton and polyester/cotton workwear and table linen. In addition Clax 100 contains an optical brightener for application at all temperatures, which is stable in the presence of chlorine bleach.

Benefits

- Excellent performance on fatty and oily soil
- Good foam control properties - optimal use of washer mechanical action
- Ensures fabric whiteness (efficient optical brightener)

Use instructions

Dosage is dependent on wash classification.

Dosage recommendation in ml/kg dry goods:

- Light soil level: 1.5 - 3.0
- Medium soil level: 3.0 - 6.0
- Heavy soil level: 5.0 - 12.0

Technical data

Appearance: Clear colourless liquid

pH (neat): 5

Relative density [20°C]: 0,98

Viscosity [mPa.s; 25°C]: 50

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; sds.diversey.com.

Store in original closed containers away from extremes of temperature.

Only for professional users / specialists.
