

CLAX[®] Plus G

33C1

Detergent - without bleach - eco-certified

Description

Clax Plus G is a complete enzymatic liquid mainwash detergent specially formulated for use in commercial, hospital and on premise laundries. The product has been designed for automatic and manual dosing and can be applied in medium to hard water, at 30 – 60 °C. Clax Plus G is suitable for washing all (coloured) cotton and polycotton fabrics. For classifications requiring bleaching/disinfection, Clax Plus G should be used with a low temperature bleach/disinfectant to obtain the maximum benefit in energy and water savings, and extension of linen life.

Key properties

Clax Plus G is a low alkaline, mild product, based on an effective blend of surfactants, water hardness sequestrants, anti-greying agents and enzymes. The phosphate-free building system ensures low water hardness ion concentration and consequently prevents precipitation of detergent components. Clax Plus G has been formulated with a blend of surfactants ensuring good particulate and fatty/oily soil removal. The presence of proteolytic enzymes leads to protein degradation, thus facilitating efficient targeted removal of proteinaceous soil such as blood and food stains. Clax Plus G is used for cleaning (coloured) fabric from hospitals and other healthcare establishments, hotels and restaurants. In addition the product is suitable for washing microfiber mops and cloths and other delicates, as it does not contain bleach

Benefits

- Excellent performance on a wide range of stains and types of soil
- Prevents greying of linen; stabilisation of soil particles in the wash liquor
- Very effective on proteinaceous soil (e.g. blood and food stains)
- Suitable for washing delicates, coloureds and microfibre mops and cloths
- Safe to use on microfiber cloths and mops
- Phosphate-free and eco-certified

Use instructions

Dosage recommendation in ml/kg dry goods (subject to wash classification):

- Soft water (8 °dH): 4-6 (low soil level), 7-10 (normal soil level)
- Medium hard water (8-15 °dH): 6-8 (low soil level), 8-10 (normal soil level)
- Hard water (> 15 °dH): 8-10 (low soil level), 10-12 (normal soil level)

For heavily soiled items and for use of Clax Plus G in combination with a bleach/disinfectant, contact your local Diversey representative.

For best results: (1) Use softened water, (2) Segregate polyester cotton articles from other articles and wash separately, (3) Separate white and coloured goods, (4) Sub-sort into light, medium and heavily soiled articles
