

Good Sense® Service Solo & Aroma Diffuser Barette

Odour neutralizer

Odour neutralizing products - the overall solution against olfactory pollution. Good Sense Service utilizes your establishment's existing air conditioning/ventilation system as a means of distributing the completely safe, odour neutralizing agents to all areas of the building. Meaning every office, lobby, corridor, reception, meeting, bedroom and wellness center will remain odour-free with minimum intervention.

Excellent odour control

- Eliminates odours of cooking, grease and food smells in general
- Different from conventional deodorants that perfume the air by masking odours, it uses O.N.T. Technology (Odour Neutralizing Technology)
- O.N.T. active molecules literally destroy chemically smelly molecules, enhancing the perfume effect, providing a long lasting fresh odour
- The active ingredients in the gel are slowly released into the air and it uses air circulation circuits to further spread the air
- Effective up to 90 days
- Silent and invisible, leaves a clean and fresh scent

Application for GS Solo:

1. Open the cover of the ventilation system
2. Take out the solo from the package
3. Place the solo in the system ventilation
4. Close the lid

Application for the GS Barette:

1. Open the aroma diffuser
2. Insert 1/2/3 barrettes for 30/60/90 sqm treatment
3. Close the aroma diffuser
4. Plug (EU, UK and US plugs inside)
5. Adjust motor intensity/speed of the vent stack according to your needs

Remark:

If needed, conduct initial test to determine quality of product to achieve mal odor neutralization. The product smell will stabilize maximum within 48 hours after initial installation.

Good Sense® Service Solo & Aroma Diffuser Barette

Odour neutralizer

Technical data

| Platform | Product Description/Packsizes | Dosage | Appearance | Relative density (20°C) |
|-------------------|-----------------------------------|----------------------|--------------------------|-------------------------|
