

## Liquid mechanical ware washing detergent for medium hard water

### Description

Suma Delta L4.8 is a concentrated liquid alkaline mechanical ware washing detergent specially formulated to provide excellent soil removal in medium hard water conditions.

### Key properties

Suma Delta L4.8 is a heavy duty alkaline liquid detergent suitable for use in single and multi-tank ware washing machines. It contains a blend of caustic alkali and powerful scale control agents, which remove fats and dried-on foods. The powerful scale control agents also prevent scaling in medium hard water conditions.

### Benefits

- Quickly removes grease and dried-on food
- Prevents scaling of the dish wash machine in medium to hard water conditions
- Very effective thanks to concentrated formulation

### Use instructions

Suma Delta L4.8 is normally applied using Diversey automatic dosing equipment. It can also be used in conjunction with integral dosing pumps where these are fitted. To ensure perfect cleaning results in soft water conditions, dose at a minimum concentration of 1g/l\*, depending on local site conditions.

Actual dosage will depend on site conditions (water hardness, degree of soiling, procedures).

At first use, rinse pump and transport tubes of the dosing system to avoid possible crystallization in these tubes caused by mixing of products.
