Sun Pro Formula 2in1 Combined Detergent and Rinse Aid

Dishwashing made simple

Product description

Sun Pro Formula 2in1 Detergent and Rinse Aid is a detergent for dish and glass washing short cycle machines. Using innovative technology that combines liquid detergent and rinse aid in to a single product. It simplifies the washing process, reduces costs, saves time, optimizes space, and reduces waste packaging and CO2 emissions, contributing to improved results. It can be dispensed using existing dispensing equipment or in conjunction with an integral dosing pump.

Features

- Combined detergent and rinse aid in one product
- Exceptional value
- Perfect for short cycle front loading or hood dishwashing machines
- Chlorine free
- Phosphate free
- NTA free

Benefits

- Professional results
- Saves space and money
- Simplifies processes
- Reduce waste packaging
- Ensures you run on the best combination
- Cuts through grease and dried-on food
- Being highly concentrated gives greater economy in use
- Prevents scaling of the dish wash machine even in 215ppm water hardness conditions
- Ensures quick drying
- Gives streak and spot-free results

Pro Formula

Unilever and Diversey come together to give you Pro Formula, a complete range of ready to use professional cleaning products, paired with trusted Unilever brands. The range is specifically developed for your professional cleaning needs, and comes with free online cleaning & HACCP guides, helping you meet hygiene standards.

Sun Pro Formula 2in1 Combined Detergent and Rinse Aid

Application

Recommended dosage: 1ml to 4ml per litre of water, depending on the hardness of the water. You can increase dosage up to 4ml / L when heavily soiled.

The use of a dosing pump allows a more precise dosage and optimizes the results.

Directions

- Sun 2in1 can be used with an automatic dispensing equipment or in conjunction with an integral dosing pump.
- Prior to first use, clean the machine and rinse out the rinse aid line. Turn off the rinse aid pump completely (ensuring you do not connect the Sun 2in1 to the rinse aid pump).
- To ensure optimum cleaning results in less than 215ppm water hardness, dose at between 1ml-4ml per litre - more detail is on rear of label. if water hardness is over 215ppm the water needs to be softened for example with salt. At 2ml per litre in water containing up to 135ppm scale deposits will be prevented.
- Please do not use in systems where an acidic rinse aid is used as a descaler and where a detergent to rinse aid dosage is below 2:1.
