TASKI® Jontec Nobile Plus

High gloss crystallizer for marble floors

Description

TASKI Jontec Nobile Plus is used for wet crystallization and protection of calcareous stone floors.

Key properties

- Quickly achieves a mirror-like shine thanks to a combined chemical and mechanical action
- Reduces water and dirt penetrability, thus facilitating daily cleaning and maintenance
- Increases contour acuity and intensifies the natural appearance of the stone
- Significantly improves slip-resistance

Benefits

- Formulated for highly efficient wet crystallization
- Contains fine-grain abrasive components for enhanced mechanical polishing
- Very strong acting

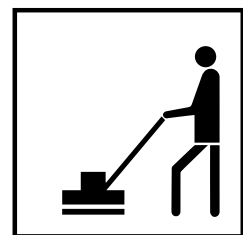

Use instructions

1. If the floor has visible scratches, then hone the surface using 400 grit diamond pad for 2 minutes per m² and followed by 1800 or 2000 grit diamond pad for 5 minutes per m² before subjecting to the crystallization.
2. Use 1% neutral cleaner solution and clean the surface using single disc machine with red pad and then vacuum it. Ensure proper rinsing with water to remove all dirt particles. Prepare paste by taking 3 parts of TASKI Jontec Nobile Plus and 1 part of water. Use 40 gram paste per m².
3. Damp the floor using wet mopping. Ensure it is just moist and no excess water on floor. It is extremely important to have the floor slightly moist before the application of TASKI Jontec Nobile Plus.
4. Spread the paste in the center of the application area. Place a low RPM single disc machine weighing a minimum of 50 kg, fitted with a red pad, directly on top of the paste.
5. Begin spreading the paste equally over the entire area to be treated.
6. Buff for 3-4 minutes per m². Do not allow the paste to dry. Sprinkle a little water whenever required to maintain a creamy paste.
7. At the end of crystallization, dilute the slurry with fresh water, pick it up with a wet vacuum cleaner. Flood and agitate the section thoroughly with plenty of neutral cleaner solution to ensure complete product rinse-off. Remove the solution with a wet vacuum cleaner.
8. After the floor dries completely, dry buff with a single disc machine, 200–1500 rpm, fitted with a soft white pad.

Dosage:

Make the solution with 3 parts of powder and 1 part of water. Slowly add the water to

**This dosage is according to optimal conditions, recommendations may vary, please consult with your Diversey representative for directions.*

TASKI® Jontec Nobile Plus

the powder and shake the mixture to a homogeneous paste. Please ensure that the paste is shaken vigorously to ensure smooth dispersion. When the paste has to applied on the surface shake the mixture adequately so that the crystals don't settle down and are adequately spread over the floor.

Technical data

White powder

pH value (neat): N/A

pH value (in use): < 2

Relative density (20°C): 1 g/ml

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; sds.diversey.com. Store in original closed containers away from extremes of temperature.

Only for professional users / specialists.

Product compatibility

Do not use on acid-sensitive surfaces, e.g. marble.

Environmental information

The surfactants used in this product are biodegradable in compliance with the requirements of EC Directives 73/404/EEC and 73/405/EEC and their subsequent amendments.

Available pack sizes

TASKI Jontec Nobile Plus is available in 5kg.
