

PROTECTIVE WAX GOLD S

allegriⁿⁱ.
CARWASH & CAR CARE

HIGHLY CONCENTRATED FOAMING AND FRAGRANCED POLISH

- Polishes and protects paintwork.
- Forms a resistant, protective, hydro-repellent film.
- Favours the flow of water on surfaces.

SUGGESTIONS

In order to guarantee the best results, it is recommended to carry out this treatment 3-4 times a year.

It is advisable to shake the container after long periods without use.

DESCRIPTION

After washing, our cars also need a so-called beauty treatment. PROTECTIVE WAX GOLD S is a highly-concentrated liquid foaming polish with a green apple fragrance, specifically formulated to polish and protect paintwork. It forms a resistant protective and hydro-repellent film on bodywork, which favours the flow of water; protecting it from the effects of humidity, smog and atmospheric agents. Its foam, which creates a scenographic effect, facilitates the total coverage of surfaces. In addition, by prolonging the contact time, it increases the effectiveness of the product. The special perfuming of this product leaves a pleasant fragrance of green apple.

Thanks to its special formulation, the regular use of PROTECTIVE WAX GOLD S helps to maintain an extraordinary shine and protection for the vehicle for over 30 days.

A specific product for automatic car wash systems that provide for a programme for the spreading and shining of polish.

Dosing with foaming equipment allows application in the form of a rich foam which offers a satisfying visual effect.
