CARWASH & CAR CARE

ODOUR NEUTRALIZER FOR VEHICLE AIR CONDITIONING SYSTEMS

- Leaves behind a pleasant clean scent in the vehicle.
- Eliminates unpleasant odours from air conditioning systems.
- Easy to use.

SUGGESTIONS

In order to keep odours down, it is recommended to use PURE AIR SPRAY at least three times a year.

DESCRIPTION

With the passing of time, unpleasant odors can be created in the air conditioning filter and an unhealthy environment inside the passenger compartment.

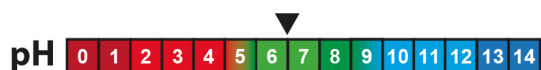

Especially during the hottest seasons, in fact, the condensation formed in the air conditioning system favors the formation of bad odors. To combat this problem, Allegrini proposes PURE AIR SPRAY, the ideal deodorant to remove unpleasant odors from car air conditioning systems, releasing a pleasant clean scent in the passenger compartment. Its use is practical and quick, particularly indicated in the spring season, before restarting the system.

PURE AIR SPRAY

ODOUR NEUTRALIZER FOR VEHICLE AIR CONDITIONING SYSTEMS

PHYSICAL AND CHEMICAL CHARACTERISTICS

Appearance	Spray can
Colour (active)	Colourless
Fragrance	Scented
Specific weight of the active ingredient	0.713 ± 0.01 g/ml
Solubility in water	Soluble
pH sol. 50%	6.5 ± 0.5

Null

AVAILABLE PACKAGING

Carton with 24 spray cans of 200ml - 016PUAS0024

USE MODALITY

Start the vehicle engine and activate the air conditioning, selecting the highest fan speed and the air recycle function.

Check that the windows are closed, place the can upright on the passenger side mat, and firmly press the self-locking spray button.

Get out of the vehicle, close the door and wait for the can to empty.

Wait a further 10/15 minutes, then open the vehicle, paying attention not to smoke or use naked flames. Switch off the air conditioning and the engine, and leave the vehicle to air for 10 minutes.

The product maintains its properties when properly stored in an unopened package, in a cool and dry place away from light and heat sources, at a temperature between 5°C and 35°C.
