ENGINE WASH AND DE-WAXER

- Ideal for the cleaning and degreasing of engines and mechanical parts.
- Detergent with high emulsifying power.
- An excellent de-waxer for paraffin waxes.

SUGGESTIONS

DESCRIPTION

The removal of greasy and oily substances from engines and mechanical parts can prove difficult, if not with the right product. RAPID is a blend of hydrocarbons which is ideal for the cleaning and degreasing of engines and mechanical parts. It is ideal for use in the automotive sector and for industry in general. The combination of solvents and surfactants renders the product easy to rinse with water and gives it highly-emulsifying properties. RAPID is also an excellent de-waxer for paraffin waxes.

ENGINE WASH AND DE-WAXER

PHYSICAL AND CHEMICAL CHARACTERISTICS

Appearance	Clear liquid
Colour	Brown
Odour	Characteristic
Specific weight	0.820 ± 0.02 g/ml
Solubility in water	Emulsifiable
Chemical properties	Anionic - nonionic
pH 20% solution in water	9.50 ± 0.5

Low

AVAILABLE PACKAGING

20 L container - 016RAPDTN20
10 L can - 016RAPD0010

USE MODALITY

Dilute the product with 2/5 parts petroleum solvent and apply to the part or engine to be cleaned with the use of a spray or hand pump. After approximately 1 minute, rinse with cold or hot water at high pressure. RAPID is also ideal for the cleaning of parts in immersion, with the use of a brush.

Used as a de-waxer: spray the product on the waxed and dry vehicle; after a few moments wipe with a sponge to completely remove the wax layer and then rinse with high-pressure water at approximately 70°C.
