CARWASH & CAR CARE

A DETERGENT WHICH IS EASILY DISSOLVED IN WATER

- Specifically for self-service areas with automatic powder dosing systems.
- Removes even the most stubborn dirt.
- Also suitable for plastic-coated and fibreglass surfaces.

SUGGESTIONS

With water of a hardness superior to 35°F, it is advisable to set the water temperature to a level no higher than 35°C in order to avoid excessive lime scale deposits. Close the package well after each use to avoid the product absorbing humidity.

DESCRIPTION

VAP POLVERE PLUS is a foaming detergent which is easily dissolved in water. Particularly effective in the removal of dirt from vehicle bodywork and metal surfaces in general. It is also ideal for the hot water washing with a high-pressure water jet of cars, heavy-duty vehicles, agricultural machines, excavators, motorcycles etc. Also suitable for plastic-coated and glass fibre surfaces. Ideal for systems with hopper dosing.

CARWASH & CAR CARE

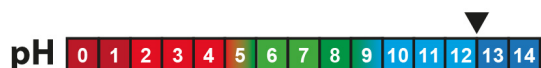

A DETERGENT WHICH IS EASILY DISSOLVED IN WATER

PHYSICAL AND CHEMICAL CHARACTERISTICS

Appearance	Powder
Colour	Pink
Fragrance	Perfumed
Specific weight	0.800 ± 0.05 g/ml
Apparent solubility in water	Complete at operational dosages.
pH sol. 5%	12-13
Chemical properties	Cationic - nonionic

USE MODALITY

Washing with a high-pressure jet cleaner:
dilute the product from 1:20 to 1:40 in preferably warm water in order to facilitate dissolving. Set up the solution for drawing with a high-pressure water jet, operating at between 60° and 70° C.
Pass evenly over the surfaces to be cleaned, then rinse thoroughly.

Moderate
